A Division of **3PARRETS**

KLER and Global's hosted Justice RMS are core offerings provided by the Kansas Highway Patrol. digiTICKET and FullCourt are value added options offered under preferred Kansas contract pricing.

KLER Justice Solution brings together four state of the art software packages to provide field reporting, electronic ticketing, RMS and Court management capabilities. They are fully integrated, endorsed by the State and offered under a State contract with preferred pricing to all Kansas agencies.

KLER – Automates your field reporting process by eliminating repetitive data entry between reports and validating data entries. Integrated with other systems, KLER increases officer efficiency and allows your agency to submit data electronically to the State. KLER is offered by the Kansas Highway Patrol at no charge and is the cornerstone of the KLER Justice Solution.

Justice RMS – Centralizes your records management and provides access to complete history for every person, vehicle, location or property entered or imported into the system. The Justice RMS will be hosted by the Kansas Highway Patrol, allowing participating agencies to share data across the state.

Global
SOFTWARE

digiTICKET™ – Using driver license scanning and NCIC query capabilities, digiTICKET simplifies the data gathering and ticketing process, enabling your officers to issue citations more quickly while reducing errors and bottlenecks caused by handwriting and other manual processes. digiTICKET can be deployed on handhelds or in-vehicle laptops. It can be procured with zero up-front cost for a minimal monthly fee.

digiTICKET™
electronic ticketing solution

FullCourt® Enterprise – Streamlines court systems with fully integrated case reporting and tracking capabilities, offering automated scheduling and document production as well as party, financial, case status and ongoing technical support.

FullCourt®
