

“I can whole heartedly recommend the digiTICKET product and the entire digiTICKET team to anyone who is interested in electronic ticketing. The innovative software and great customer service combined to create the right environment to make our agency a leader in this area.”

– Assistant Chief Mike Carter, Sand Springs PD

# Never Write Another Ticket!

**digiTICKET**<sup>TM</sup> is an easy to use electronic ticketing solution that rapidly creates and processes tickets, eliminates errors, captures lost revenue and easily works with your existing systems.

Using digiTICKET, driver license information is quickly captured with a barcode or magnetic stripe reader. Citation information is easily entered and a paper ticket is printed in a fraction of the time it takes for a handwritten ticket. Officers upload ticket information electronically where it can be used for analysis, reprints and reporting. It can also easily work with existing RMS or court case management systems.

digiTICKET is easy to acquire, too. You can purchase our software to use on existing mobile data computers or on new rugged handheld computers. You can also choose our digiTICKET as a Service pricing option. **The Service pricing option requires no upfront capital outlay and provides positive Return on Investment (ROI) starting the very first month – and requires no contract term.**

With our Service pricing option, your officers will have digiTICKET in their hands almost as fast as digiTICKET has your officers back on the road!

## Key Benefits

### Increase Safety and Productivity

- Reduce dangerous roadside time
- Force multiplier – write more tickets in less time, spend more time patrolling
- Eliminate paperwork and duplicate tasks from ticket creation to data entry
- Easy access to daily citation data and productivity reporting
- Capture GPS coordinates, electronic signatures, voice notes and photos

### Flexible and Easy

- Highly customizable and easily configured
- Looks like your forms, your tickets, your processes
- Simple to use – requires less than two hours of training
- Supports rugged handheld computers and Mobile Data Computers (MDCs) laptops
- Easily integrates to existing RMS and Court systems

### Immediate ROI

- digiTICKET can be purchased or used as a monthly service
- Reduce administrative costs and increase ticket productivity
- Eliminate errors and decrease ticket dismissals
- No contract terms and guaranteed satisfaction
- Reduce administrative costs, data entry errors and processing delays

## Never Write Another Ticket

digiTICKET is the most flexible and user-friendly electronic ticketing solution on the market today! Yet, digiTICKET can be quickly and easily configured to exactly meet your specific needs. We precisely match your ticket format as well as interoperate smoothly with your other software applications. digiTICKET is deployed through a series of implementation exercises to ensure police, court and IT policy requirements are met.

## The ROI of e-ticketing

digiTICKET enables officers to issue tickets in a fraction of the time required for handwritten tickets. Using data validation and advanced web technology, digiTICKET reduces errors and provides direct access to ticket data for police administrators and court personnel. Decreasing ticket processing time enables officers and court personnel to focus on other activities and eliminates the redundant handling of ticket data prone to human error. Previous buyers of digiTICKET have proven the solution pays for itself in less than six months. With our digiTICKET as a Service pricing option, you could see positive returns in the first month – with no upfront costs!

## About Saltus Technologies, LLC

Saltus Technologies is dedicated to providing law enforcement agencies with the most complete and easy-to-use ticketing software available. Our solution is designed with the assistance of police and court personnel and includes support by a team of highly qualified engineers, national manufacturers and public safety partners.

**We pride ourselves in having the easiest to use software with the easiest to understand pricing and being the easiest company to work with in the market today!**

Multilanguage Software

## digiTICKET Software

### Officer Friendly

- Easy to use – officers are writing tickets within minutes
- Scans barcodes or magnetic stripes on drivers licenses, state & military IDs from the US, Mexico & Canada
- No need to remember statutes, fine amounts or court dates all contained in the system and automatically updated
- Fines are auto-calculated based on offense, multiple violations easily added
- Court dates are auto-assigned using rules centrally managed from the web
- Handles multiple ticket types, including different printed ticket formats
- Captures photos, electronic signatures, GPS coordinates and written or voice notes

### Easily & Highly Configurable

- Exactly match your tickets, your processes
- Generate reports for analysis, audits & other uses such as racial profiling
- Web based backend – hosted or installed onsite; accessible by all users from any location with internet access

### Agency Friendly

- Reproduce exact copies of tickets in PDF format & print on standard office inkjet or laser printers
- Centralized web management & browser-based audit reporting capabilities
- Online ticket search, productivity reporting, mapping & citation analysis functions
- Print tickets in other languages such as Spanish or French

## digiTICKET Hardware

- Utilizes rugged, weather resistant handheld computers or Mobile Data Computers (MDCs) from leading manufacturers
- Print tickets using mobile Bluetooth thermal printer
- Rechargeable batteries easily last through a 12 hour shift
- High temperature and all-weather ticket paper available

## Training and Support

- Officer training lasts less than two hours
- 24x7x365 Technical Support
- Online System Documentation
